Appendix 1: Risk Assessment for Healthcare Workers Exposed to Persons with COVID-19

I. INTERVIEWER	NFORMATION				
Interviewer name (Last, First)					
Interview date (DD/MM/Y)	YY)				
Interviewer affiliation					
	<u> </u>				
II. HEALTHCARE	VORKER INFORMATION				
Last name					
First name					
Sex	☐ Male ☐ Female ☐ Prefer not to resp	pond			
Age (years)					
Healthcare worker role (check all that apply)	☐ Facilities/maintenance worker ☐ Food services worker ☐ Laboratory worker ☐ Medical doctor (attending) ☐ Medical doctor (intern/resident) ☐ Medical technician ☐ Midwife ☐ Nursing assistant or technician (or equivalent) ☐ Nutritionist ☐ Other, specify	☐ Phlebotomist ☐ Physical therapist ☐ Physician assistant ☐ Radiology technician ☐ Registered nurse (or equivalent) ☐ Respiratory therapist ☐ Student nt) ☐ Teacher/Preceptor ☐ Ward clerk			
Healthcare facility type (select primary location)	☐ Hospital ☐ Primary health center, specify level ☐ Outpatient clinic, specify clinic type ☐ Nursing home or skilled nursing facility ☐ Home care ☐ Other, specify				
III. COMMUNITY EXPOSURES					
Healthcare workers who respond "Yes" to any of the questions in this section should be considered as having had a high-risk exposure in the community. "Uncertain" responses should be considered on a case-by-case basis.					
Date of most recent comm	unity exposure to a person with COVID-19 (D	DD/MM/YYYY)			
In the past 14 days, did you live in the same household as a person with COVID-19?					
In the past 14 days, were you within one meter of a person with COVID-19 for 15 minutes or longer (e.g., meeting room, workspace, classroom, or traveling in any type of conveyance), outside of a healthcare facility? ¹					
In the past 14 days, did you have direct physical contact with a person with COVID-19 (e.g., shake hands) or with their infectious secretions (e.g., being coughed on or Uncertain touching used tissues), outside of a healthcare facility?					

¹ Guidance on defining close contacts of a person with COVID-19 includes being in the same closed environment for 15 minutes or more at a distance of less than 2 meters, per ECDC (https://www.ecdc.europa.eu/sites/default/files/documents/covid-19-public-health-management-contact-novel-coronavirus-cases-EU.pdf); face-to-face contact within 1 meter for more than 15 minutes, per WHO (https://www.cdc.gov/coronavirus-(2019-ncov)); or being within approximately 2 meters for a prolonged period of time, per CDC (https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html).

IV. HEALTHCARE WO	RKER ACTIVITIES AND EXPOSURES						
Date of most recent exposure to known COVID-19 patient(s)in a healthcare							
setting (DD/MM/YYYY)							
Name of healthcare facility where exposure occurred							
Health unit type(s) where	☐ Cleaning services ☐ Outpatient area ☐ Op	erating roo	m 🗆 Pha	rmacy

where a COVID-19 patient received care?				_ 0			

² If COVID-19 patient had source control during these interactions (e.g., facemask, N95 respirator, or intubation) then exposure would be considered low-risk

³ Information on the use of personal protective equipment is available at: https://www.who.int/publications-detail/infection-prevention-and-control-during-health-care-when-novel-coronavirus-(ncov)-infection-is-suspected-20200125

⁴ Patient care activities include, but are not limited to: taking vital signs or medical history, performing physical exam, providing medication, bathing, feeding, emptying bedpan, changing linens, drawing blood, performing x-ray, collecting respiratory specimens, inserting central or peripheral line, inserting nasogastric tubes, placing urinary catheter, providing injection, and providing tracheostomy care.

⁵ Aerosol-generating procedures include, but are not limited to: tracheal intubation, non-invasive ventilation, tracheotomy, cardiopulmonary resuscitation, manual ventilation before intubation, bronchoscopy (https://www.who.int/publications-detail/rational-use-of-personal-protective-equipment-for-coronavirus-disease-(covid-19)-and-considerations-during-severe-shortages)

				Use this section to describe healthcare interactions with COVID-19 patients and determine whether appropriate PPE								
was worn. Record details about PPE the healthcare worker wore and determine if it was appropriate based on guidance												
on the use of PPE. ⁶ Please see the examples in the first two rows.
